

Do You Know Who You Are?

Magnum

Once upon a time, things that we know
Passing us by, things that were true
Disappearing fast, lost in the flames
Heard someone shout I do proclaim

I will remember all things in time
I will remember till they unwind
Somewhere deep in your soul
Hiding out of control

Do you know where you're going?
Have you come very far?
Are you frightened of showing
You've become who you are?

It makes your blood run cold
Your sanity's been bought and sold
Do you know where you're going?
Do you know who you are?
Who you are?

It's raining in your face, head hanging low
And there's a place you want to go
Follow every sign, no compromise
Walk every path so civilised

I will remember all things in time
I will remember till they unwind

Somewhere deep in your soul
Hiding out of control

Do you know where you're going?
Have you come very far?
Are you frightened of showing
You've become who you are?

It makes your blood run cold
Your sanity's been bought and sold
Do you know where you're going?
Do you know who you are?
Who you are?

It makes your blood run cold
Your sanity's been bought and sold
Do you know where you're going?
Do you know who you are?
Who you are?

Do you know where you're going?
Have you come very far?
Are you frightened of showing
You've become who you are?

It makes your blood run cold
Your sanity's been bought and sold
Do you know where you're going?

Do you know who you are?
Who you are?
