

## Matter of Survival

Magnum

Tell me how long you will take  
Trying to make up your mind  
Maybe it's already too late  
I'll just be left behind  
For right or wrong, baby, still I hold on  
Don't let it burn down in flames

It's a matter of survival  
A matter of survival that we're apart  
That's all we live and die for  
I wish someone would tell it to your heart

So scared when I walk to your door  
I saw you turn out the light  
I can't take this hurt any more  
I shout it out to the night  
Living without you ain't living at all  
Tell me how do I get by?

It's a matter of survival  
A matter of survival that we're apart  
That's all we live and die for  
I wish someone would tell it to your heart

I walk the streets in the night  
I feel your spirit deep inside  
It comes with the darkness, stays till the light  
I got to face it, there's nowhere to hide

It's a matter of survival  
A matter of survival that we're apart  
That's all we live and die for

A matter of survival  
A matter of survival that we're apart  
That's all we live and die for  
I wish someone would tell it to your heart

Your heart  
A matter of survival  
A matter of survival  
A matter of survival
