

The Last One On Earth

Magnum

The lights are turned down
The tiger's set free
You stand on your chair
Feel mortality

You chant common prayer
The dead come to life
The secrets of old
Are nowhere tonight

You know I felt like the last one on earth
The sun don't shine anymore
You know I felt like the last one on earth
That's never happened before

As time slips away
And covers the change
Of everything old
And everything strange

The clock strikes the time
A ghost in the rain
The waiter won't come
But no-one complains

You know I felt like the last one on earth
The sun don't shine anymore
You know I felt like the last one on earth
That's never happened before

Somewhere out on the edge of time
They all fall to sleep
Falling through a kaleidoscope
Far beyond belief

Deeper and deeper the tunnel grows deeper
Wake me or shake me to open my eyes

The sun don't shine anymore
That's never happened before

You know I felt like the last one on earth
The sun don't shine anymore
You know I felt like the last one on earth
That's never happened before
