

Wide Awake

Man Overboard

It starts with another day
Alone in your car
There's gotta be another way
For me to get to you
This distance is real
My heart burns at the wheel
There's gotta be another way
For me to get to you

I saw you leaning on the hood of my car
We're not leaving here
We're not leaving here
I need to be with you alone in my arms
I am dying here
I am dying here
When you're not home
When you're not home
We're laying wide awake
We're always wide awake

It starts with another day
Alone in your room
I wish I had the time to stay
But it's something I have to do
This distance is real and you're dying to feel
There's gotta be another way
For me to get to you
