

Send Me a Sign

Marc Broussard

Oh, we move
Through the thick and the thin
When it's all we can do
Take a stand, don't lose
Not a moment to thinking you got something to prove

And we you have to say goodbye know that it's alright
And when you get to the other side if it's not too much please try

Send me a sign
Tell me you've arrived
Write it in the stars of a newborn's eyes
It's hope, peace, all I'll ever need if you just send me sign

Hey, can't wait
To reach for the top until we're over the hill
Then it's hard
Too late
Didn't know this was always part of the deal

And we you have to hang it up, know you've made your peace
But if the trouble ain't too much won't you give me something please

Send me a sign
Tell me you've arrived
Throw a shooting star through the cold dark night
To see, feel, hold on for something real if you just send me

Oh, I know
Sure as the wind blows over the seas
In time
You and I
Will return to the ground like falling leaves

Send me a sign
Tell me you've arrived
Throw a shooting star through the cold dark night
To see, feel, hold on for something real if you just send me sign

Tell me you've arrived
Reach down from heaven
With the big blue sky
The sun, air, wanna feel you everywhere if you'd just send me a sign

Send me a sign
