

Flower Moon

Maria Taylor

Once upon a past life
You were everything
My world, my will and my when
But the last passed
With the hourglass
With all that couldn't last
And staying would come to an end

I looked down as you soon be around
You couldn't see the tears drops by
We danced just like we used to do
Under the flower moon

Another day in my life
Was it black or white
But I needed to
Love and be loved
But I chose this different fight
Chasing each grim in the night
As you talked in your ivory bed

So tonight let us dance with the light
And hear the song [?]
And we'll sing it to like we used to do
Under the flower moon
