## The Trawlerman's Song

## **Mark Knopfler**

WeâDDre taking on water Diesel and stores Laying up awhile Before iâDDm back on board TheyâDDre patching her up To go fishing again TheyâDDre welding her rudder Scrubbing her keel Scars on her belly Need time to heal In the dock With the trawlermen

I know all the people Thereâlls nobody new Soon weâlll be leaving With the same old crew On the green water The tumbling sea They ainâllt running Like the good old days Timeâlls just slipping Down the old slipways In the dock So dear to me

Dark is the night I need a guiding light To keep me From foundering On the rocks My only prayer Is just to see you there At the end Of my wandering Back in the dock

I could use a layoff Getting my strength back But thereâlls a loan to pay off And a few skipjack So itâlls a turnaround Back in the southerly wind Pirates coming in To steal our gold You can count yourself lucky With a profit in the hold In the dock When we come in

Dark is the night I need a guiding light To keep me From foundering On the rocks My only prayer Is just to see you there At the end Of my wandering Back in the dock
