

# Raven

Mark Owen

All the gods came too when you wake up  
There were more of them based on what we thought  
Couldn't keep track so they gave us all a name

Saw a young shadow dancing in the street  
Knew that someday she will comfort me  
Turning the bass loud but it's time we meet again

And we both won't march til we don't have now  
We could ask for more but we don't know how  
It's the choice we made, it's the life we know  
When the raven calls and it's time to go

Every idea and she's starting to kiss  
Nothing begins in an empty space  
And we both found when I look into your heart

Kiss you once more and we don't come back  
Heard you've been hiding came up out in dark  
If we leave now we'll be longing for a star

It's a lonely way but it's all we know  
When my raven calls and it's time to go

[Chorus 2x:]

My love, angel raven  
And she's more than enough  
Tell my love if you see her  
She's my raven and she's loved
