Woke up and just felt right Phone blown like a tailpipe Today's schedule air tight I turn a short day into a long night See you soon if you got the heart Meet you outside reny park Hurry up it it's getting dark We don't say too much And that says a lot Hoped into that old Benz Drive through where that road ends Good times with some old friends I got just the thing if you so tense Burn one lets go do some She got me stoned as Medusa Zoned out with a blank stare I'm looking into the future

Hold up ain't nothing gonna hold us
Put the devil to the side
Got an angel on my shoulder
And I'm like hello
It's good to finally let go
I ain't worried bout a thing
I just like to keep it mellow

Yea I like to keep it mello
I smoke and keep it mello
I drink and keep it mello
Everyday I keep it mello
Everyday I keep it mello
I smoke and keep it mello
I drink and keep it mello
Everyday I keep it mello
Everyday I keep it mello

It's like 4 am and I'm bored again When that 40 end When that dream team all played out and they hit bench I just step back lemme soak it in I've seen the ups and downs So I get it now, I was born to win It's my time bout time, my turn I can't lie Waiting for that one spark My one hope to catch fire I'm fine, I'm high Light rain through the sunshine Trying to man this old boat I'm the captain now and it's crunch time I don't care if I'm getting paid Need the week but I get the day Wide awake when I need sleep I'm knee deep but I set the way Focused on that one mistake let it free don't let it break Fuck it all, I'm turning in My celly's off the great escape

Hold up ain't nothing gonna hold us
Put the devil to the side
Got an angel on my shoulder
And I'm like hello
It's good to finally let go
I ain't worried bout a thing
I just like to keep it mellow
