## **Be Here Now**

## **Mason Jennings**

Be here now, no other place to be Or just sit there dreaming of how life would be If we were somewhere better Somewhere far away from all all worries Well, here we are

You are the love of my life

Be here now, no other place to be All the doubts that linger, just set them free And let good things happen And let the future come into each moment Like a rising sun

You are the love of my life You are the love of my life Yeah, you know you are

Sun comes up and we start again Sun comes up and we start again

And it's all new today All we have to say Is be here now

Be here now, no other place to be This whole world keeps changing, come change with me Everything that's happened, all that's yet to come Is here inside this moment, it's the only one

You are the love of my life You are the love of my life Yeah, you know you are

Sun comes up and we start again Sun comes up and we start again

It's all new today All we have to say Is be here now
