

Follow The Leader

Matthew Ryan

It's follow the leader, baby
That's how it's gonna be
If you ever really wanna get lost
Then follow me

Follow the leader

We're in a solar system
Together and alone
The bills, the smoke, the furniture
The happy home

Now you can follow your gut
Or you can follow the past
But if you knew an eclipse was coming

Why'd you even ask?

Follow the leader

(There's brighter days ahead
I've seen them on tv
Word is there's something big
Hidden up their sleeve)

So maybe it gets quiet
And maybe it gets numb
At least then there's still something
To share with someone

Follow the leader
