

Try

Maxi Priest

Don't rush the move you gotta make
Don't give it all before you take
Just step aside and watch a while
Be prepared to walk an extra mile
Flip the switch and check the groove
And now's the time to stop talk and move
Education is the only way
To learn to live to fight another day

We can make it if we try try try
Who's the mathematician Jah Jah on a mission try try try

Don't get caught in no desperation
Use your skill from your ghetto irritation
Feel the vibration
Some people see it astrologically
But I didn't get that from my triga knowledgy

What a friend who would deceive
Use your faith when you believe
Thought he was a friend
The human love we thought was real
So off and on so what's the deal
Thought he was a friend yeah

We can make it if we try try try
Who's the mathematician Jah Jah on a mission try try try

Now tell me
Who's the mathematician
Jah Jah on a mission
Trying to find a way in this world of attrition
Jah Jah on a mission
Work it out, work it out

Keep it real

We gotta find a sanctuary
Flip into the 21st century
Keep it real and lose the fakes
Learn all your lessons from your own mistakes
Children now will come of age
Let's keep the love as we set the stage
Justice for all we can stand tall
No more comin' from back against the wall hey

We can make it if we try try try
Who's the mathematician
Jah Jah on a mission
