

## What's the Dillio?

Mest

There's this little girl and I think she's so fine  
And I'm not giving up until she is mine  
See I want to be her boy and I want her to be my girl  
Because since I've met her I been in another world

She was just my friend and now I want more  
There's something special to her she's not just another whore I

See everybody else has gotten involved  
That's not the way this should've evolved  
I should have just told you how I felt  
But when I'm around you my words just melt

She was just my friend and now I want more  
There's something special to her she's not just another whore
