Frustration

Frustration In my lexicon of hatea I see you with your portraiture Does he love you? Does he love you too?

The brush strokes Kiss your breasts and toes I cry icicles in my stein The heartbeats flutter With an abnormal rhythm

The pain shoots through my body A sword between my thighs I wish that I could kill you But I too love your eyes

You're feeling less whore but you stimulate The hatred smolders in your eyes I'd drop to my knees in a second To salivate in your thighs

But all I do is fall over I don't have the strength I once had In you and your prickless lover And his easel in his eyes

I feel the pain creep up my leg Blood runs from my nose I puke my guts out at your feet You're more man than I To be dead to have no feeling To be dry and spermless like a girl

I want so much to hurt you I want so much to hurt you I want so much to hurt you Marry me I want you as my wife

Spermless like a girl More man than I More man than I

Frustration In my lexicon of hate You're feeling less like a whore but you Stimulate

All I do is fall over I don't have the strength I once had All I do is fall over I don't have the strength I once had

I want you so much to hurt you I want so much to hurt you I want so much to hurt you
