

# 1 Sun

Miley Cyrus

We all walk around  
And waste life  
It's just gonna go on forever  
Like there's some eternal endless supply  
Of what it takes to keep us alive  
There might be a day  
When everything goes away  
To remind us how ungrateful our culture is  
We need to take time  
To replace what's stolen from Mother Nature

We only have  
1 sun, 1 moon, 1 me  
1 you  
And we only have a little time to show how much we love  
The sun (the sun) the moon (the moon)  
How much I really love you  
We only have a little bit of time (time, time, time)

I once heard  
Grace Jones say  
I have my own concept of time  
I always think bout' that cause I've always felt like  
I was running a little behind  
What's in front of me  
I don't know  
Cause I can't see what hasn't started to grow

We only have  
1 sun, 1 moon, 1 me  
1 you  
And we only have a little time to show how much we love  
The sun (the sun) the moon (the moon)  
How much I really love you  
We only have a little bit of time (time, time, time)

Wake up, world  
Can't you see the earth is crying?  
Wake up, world  
Can't you see all the clouds are dying?  
And maybe one day there won't be rainbows  
Grass won't be green and the sky won't be blue  
I don't wanna see a cyclone  
There's no sun, no moon, no me, no you

We only have  
1 sun, 1 moon, 1 me  
1 you  
And we only have a little time to show how much we love  
The sun (the sun) the moon (the moon)  
How much I really love you  
We only have a little bit of time (time, time, time)
