

Something About Space Dude

Miley Cyrus

Something in the way you love me
Something in the way you stare
I wanna be there skateboarding
In a space dude's evil layer

Something in the way you fuck me
You're never fucking there
Something in the way you touch me
I wonder, I should care

Ok, keep that last one

Sleeping is optimistic
But we can live without dreaming
It's the only time we can really be together
But I'm optimistic
There's something giving me that feeling
There's something giving me that feeling
There's something
There's something giving me that feeling
There's something
