

Daydreaming

Milky Chance

A hundred ways, I don't wanna see
During day, I just can't believe
Where did I go? I need to know the deepest me
I get sucked in thinking of the sea

I talk to you
With my head up in the clouds
See that light shining through
Might be the moon
Giving way throughout the night
Through the night

When I'm daydreaming
When I'm daydreaming

Maybe we're just passing through
Two souls venturing into to the new
The life before, whoever really knew
Seek a different point of view
Common ground where flowers bloom
Pink, yellow, red, and blue
Make it to the middle
Make it all so simple, so simple

I talk to you
With my head up in the clouds
See that light shining through
Might be the moon
Giving way throughout the night
Through the night

When I'm daydreaming
When I'm daydreaming

When I'm daydreaming
When I'm daydreaming
When I'm daydreaming
When I'm daydreaming
