

# Spiders

Moby

We just had to ask  
Maybe some one out of heaven  
Would hear us down here

We couldn't bear to stand  
How the people leave us waiting  
For something up there

Oh, why did you leave?  
Why won't you come?  
And save us again?

Come back to us spiders  
Come uncrush my hands  
Let peace and beauty reign  
And bring us love again, like you can

We just didn't know  
Some one there outside of heaven  
Heard us down here

We couldn't stand it here  
Other people leave us longing  
For something up there

Oh, why did you leave?  
Why won't you come?  
And save us again?

Come back to us spiders  
Come uncrush my hand  
Let peace and beauty reign  
And bring us love again, like you can  
[2x]

So much time, we need to ask everything  
How did it go, you need it I got it

Come back to us spiders  
Come uncrush my hand  
Let peace and beauty reign  
And bring us love again, like you can  
[2x]
