

## We Were Here

Montgomery Gentry

You wouldn't even know it's there  
Piece of racetrack road somewhere  
Underneath that new four lane  
There's Chevy rubber that bears my name  
Yeah we used to own this town  
We used to burn it down  
Left some circles 'round that square  
Left some crazy everywhere

Had to cover our tracks in the blacktop  
Turned a stomping ground into a parking lot  
Painted over our names, but so what?  
We were here, we were here  
Might have let that bridge on the river rust  
The [?] grow wild where the party was  
Ain't a footprint left down in that mud  
But we were here, we were here

Somewhere along a back road fence  
We lost some backseat innocence  
You shook me all night long  
We'll always be more than a song  
Her name was worth the climb  
Stayed up there a long time  
Things changed and so did we  
But you, can't erase a memory

Had to cover our tracks in the blacktop  
Turned a stomping ground into a parking lot  
Painted over our names, but so what?  
We were here, we were here  
Might have let that bridge on the river rust  
The [?] grow wild where the party was  
Ain't a footprint left down in that mud  
But we were here, we were here

Had to cover our tracks in the blacktop  
Turned a stomping ground into a parking lot  
Painted over our names, but so what?  
We were here, we were here  
Might have let that bridge on the river rust  
The [?] grow wild where the party was  
Ain't a footprint left down in that mud  
But we were here, we were here
