

Your golden lies feed my role  
In this forgotten space race under my control  
Who's returned from the dead?  
Who remains?

You know I don't want you  
and I never did  
I don't want you  
and I never will

You wanted more than I was worth  
And you think I was scared  
And you needed proof  
Who really cares anymore?  
Who restrains?

You know I don't love you  
and I never did  
I don't want you  
and I never will
