

# Break The Fever

Mutemath

It wasn't long ago  
Imagination could've never crashed  
And now I'm wondering  
How long reverse psychology can last, last

Another point of view  
Constantly shows up uninvited  
My head is burning up  
From all the voices jammed inside it

Childhood beliefs can hardly breathe  
Waiting to see its favorite half  
Of every glass

All this time we starved  
Just trying to break the fever  
We caught this life so short  
And I'm trying to break the fever  
We caught, don't mind this war  
Just trying to break the fever  
We caught, surprise us all  
And finally break the fever

My sympathies for the obsolete are climbing higher every day  
It ain't so funny when you see it's you that's in everyone's way

I've got nothing to prove and no one round to care if I did  
My head is burning up from all the doubts that overcrowd it

It's all a matter of time before I run out of points to make  
Out of points to make

Can't you see all the time it's wasting  
They can't believe all the space we're taking

All this time we starved  
Just trying to break the fever  
We caught this life so short  
And I'm trying to break the fever  
We caught, don't mind this war  
Just trying to break the fever  
We caught, surprise us all  
And finally break the fever

Those monsters in your head so high, so high  
Play dead, don't be afraid tonight, tonight  
Those monsters in your head so high, so high  
Play dead, don't be afraid tonight, tonight

All this time we starved  
Just trying to break the fever  
We caught this life so short  
And I'm trying to break the fever  
We caught, don't mind this war  
Just trying to break the fever  
We caught, surprise us all  
And finally break the fever

Just trying to break the fever  
Trying to break the fever  
Just trying to break the fever  
Trying to break the fever

Don't mind this war  
Don't mind, don't mind this war  
Don't mind, don't mind, don't mind this war  
(Don't, don't, don't)

Trying to break the fever  
Trying to break the fever  
(Don't mind, don't mind, don't mind this war)  
(Trying to break the fever)
