## **Magic Rabbit**

## **My Brightest Diamond**

I had a magic that could sing Maybe I took her from her mother too early She never came out of recovery

Even on summer days she'd complain She couldn't take the chill out of her bones Maybe I took her from her mother too early I put her outside in the sunshine

All the rabbits died for supper tonight All the rabbits died in the spotlight

I had a magic that would sing And boy oh boy was she a pretty thing By some great mystery she looked to me Like she was wearing thin

Are you fading away magic Are you fading away Are you fading away all the rabbits died Are you fading in the spotlight

Are you fading away magic Are you fading away all the rabbits died Are you fading away in the spotlight Are you fading my magic rabbit Magic, oh Are you fading away magic Are you fading away, rabbit, rabbit, rabbit...
