

Identical Twin

Neil Finn

Beware late night thinking
Before starlight's over
The world has been shaken

Rain
I felt myself sinking
And you lay above me
Identical twin

Beware violent mood swing
Before I can stop it
The word has been spoken

Rain
I felt myself sinking
And you lay above me
The earth drew me in
Identical twin

Some say that's good
That you can be certain
You did all you could
Leave all your questions

I felt myself sinking
And you lay above me

My high flying one
My light fingered foe
My life filled below

It's all coming back
It's all going back
