Been Thinking About It

Newton Faulkner

If I was lost Lost at sea I'd grab the flag and I'd swim all the way home Cause it's it in my genes I've been thinking 'bout it If I like you, And you like me, Why the hell are we wasting our time? Are you too afraid to cross that line? I've been thinking 'bout it If this was to end right now I'd go with a grateful smile I've been thinking 'bout it If life's so short, Then what's the cost Of working day and night five days a week You say you hate it but it makes ends meet I've been thinking 'bout it My time here on earth could be A fragile and fleeting thing But if this was to end right now I'd go with a grateful smile I've been thinking 'bout it I've been thinking 'bout it Been thinking 'bout it I've been thinking 'bout it If I like you, And you like me Why the hell are we wasting our time?
