## Perihelion

## **Night In Gales**

Through thousand razorages i carried the mark Of yet another thousand tragedies

We are the chaosdeath warriors Spat from damnation's feverthorndreams The glorious plague is ours ! ...fed by the warslut's travesty

The mark that, in rapture and pain, Once bejewelled the skyslave's robe A lightshroud woven of embers and scars Ever to burn, fever to bring...

Perihelion...

Slaughtered 'neath the horizon's whore

We..we kill the stench of heaven..we kill...!!
