Droid Sector

Nocturnus

```
ENTER THE DROIDS
Cybernetic cralts approaching
Through skies lit with fusion discharge
Androids from the gamma quadrant
Moving at the speed of death
Now the human race is sovulnerable
Invasion set for attack
"Enter the Droids"
Command-Mission-Destroy-Planet-
Three-From-Their sun
Caught within my tractor beam
Bringing the craft to me
Disable the robot for my own use
to aid my escape
Fleets of ships are now arriving,overtaking
Physical evasion is my only demise
Left to me for my survival
Gaining data from their system,overriding
To complete my invention,the time machine
Only question is"will it function"?
```
