

## It Came In A Flash

Nurses

(Mumbo jumbo)  
I made them I made them  
All my aches all my aches I made them  
My thinker's talkin to me  
And I don't even gotta ask  
I've heard the soundiest things  
That never even had a chance  
All my aches I made them

How many angles cut through your eyesight  
And when you're braver will you stand my height

They saved me they saved me  
All my aches all they saved me  
My body's worryin me  
It's showin no sign at all  
Of askin serious things  
That never even had a thought  
All my aches they saved me

How many angles cut through your eyesight  
And when you're braver will you stand my height  
I'm working double just to get me by  
How many anchors cast from your overbite
