

Human Error

Oh Land

This is no hotel
This is no home
Just another bed where we sleep
Temporary home where we live

Listen to my voice now
Keeping my calm
Raising only questions
Didn't plan to give you this

My baby didn't ask for change
They say what you only need is strict routines
And my baby doesn't know the rules
He'll grow up missing me when he's not missing you

And why did I expect
That I had my life planned out perfect
Adding all the numbers correct
No missing digits, no real mistakes
Just human errors
Make human hearts break

This is no ending, this is no start
Just another day we get through
Hard to stay sane and stay true
Letting no judgment ring in my ears
Only the indifferent air
Silence only in here

My baby didn't ask for change
They say what you only need is strict routines
And my baby doesn't know the rules
He'll grow up missing me when he's not missing you

And why did I expect
That I had my life planned out perfect
Adding all the numbers correct
No missing digits, no real mistakes
Just human errors
Make human hearts break

I had my life planned out perfect
Adding all the numbers correct
No great win without heartbreak
Just human errors
Make human hearts change
