Speak to Me with Love

Oh Land

Send the troops in - here they come See them marching one by one But that won't scare me off Just speak to me with love And I will stay soft

Daggers will fly
Around my ears tonight
And the only weapon I know how to handle right
Is staying out of sight

So send the troops in - here they come See them marching one by one But that won't wind me up Just speak to me with love And I will open up

Silence is all I can throw against the wall And the louder you will shout The longer I will shut my mouth

Send the troops in - here they come See them marching in one by one But that won't scare me off Just speak to me with love And I will stay soft

Send the troops in - here they come See them marching in one by one But that won't wind me up Just speak to me with love And I will open up
