

## Act of Faith

Olivia Newton-John

Sure as we know there will be dawn  
That we'll see the morning sun  
We should trust that thru the night  
Our love will still shine on  
Sometimes we get too comfortable  
With things the way they are  
What we both would ask of love  
Might seem a bit too far

So far away - from hope and trust  
Will love still be there for us  
I pray - that forever  
We will face all our fears & believe  
That love will be there for us  
So we pray - 'cos love is an act of faith

Once you said you would never leave  
As you held me in the dark  
I knew you by your love for me  
And I soothed your longing heart  
But now we're lying here miles apart  
But close enough to touch  
A sea of silence - much too wide  
We stand to lose so much

Drifting away - from hope and trust  
Will love still be there for us  
I pray - that forever  
We will face all our fears & believe  
That love will be there for us  
So we pray - 'cos love is an act of faith

You have my everything  
So please don't take it away  
The hope and trust  
That love will be there for us  
I pray - that forever  
We will face all our fears & believe  
That love will be there for us  
We pray - that forever  
We will face all our fears and believe  
That love will be there for us  
So we pray - 'cos love is an act of faith
