

The View from Here

OMD

Climb the mountain of your fear
You should see the view from here
Walk with me until we're done
Take the long road. don't go home

As the knife goes deeper in
Nothing remains of where it's been
Pull the petals one by one
Finally they're all gone

Sliding backwards down the slope
Clinging desperately too hope
Watching you untie the rope
Cast away, couldn't Cope

Climb the mountain of your fear
You should see the view from here

Climb the mountain of your fear
Easy said and done from here
