

Bring Out The Beast

Omen

If you know what I am thinking deep inside my mind
Maybe you will take a chance not fearing what you'll find

You bring out the beast in me woman you are hot and I'm on fire
All night we set the world ablaze you bring out the beast in me

Your eyes flash intention you move into my sights
I will deliver the hardness we hunger for the nights

Scratch my back I'll scratch yours too
With all this pleasure we need black and blue
I never learned a thing all I do is take
The game is over I'm burning at the stake

If you scratch my back I'll scratch yours too
With all this pleasure we need black and blue
I never learned a thing all I do is take
The game is over I'm burning at the stake
