

When I was younger  
You told me I should get my shit together  
You said life is a painting  
But all your colors always bleed together  
Woo all the times you said I wasn't just quite right  
Woo and all I was trying to do was search for a light

When you said look for your sunshine it's not there  
I told myself that I don't care  
I found some new innovations  
Might just be my imagination  
But people can dream  
When I was younger  
You told me I should get my shit together  
Because life is a painting  
But you ain't trying to show me you ain't clever  
Woo for all the times you said I wasn't just quite right

But you said look for your sunshine it's not there  
I told myself that I don't care  
I found some new innovations  
Might just be my imagination  
People can dream (People can dream, people can dream, people can dream)  
Yeah

In my dark days and night  
It might've been just a dream  
In these dark days and night  
I'll be more than what you see  
In my dark there's a light  
It might've been just a dream  
In these dark days and night (Dark days and night)

Oh when I was younger  
You told me I should get my shit together (People can dream)  
When I was younger  
So why your colors always bleed together

People can dream (Woo)  
People can dream  
People can dream (Woo)
