

# It Was the Night

Other Lives

It was the night that you had left us You were so gone when the  
y found you

It was the hour that you had come back You were so gone

All of the reasons we're not meant to know

Let the wind sweep over you And hear the sound that's calling y  
ou to come back We'll find you, we know that you're there

It was the night that you had left us You were so gone when we  
found you

All of the years you can now put behind you

Let the wind sweep over you And hear the sound that's calling y  
ou to come back We'll find you, we know that you're there
