

Enemy

Our Last Night

You took the first shot with a bullet you created
Constructed from lies and words I never said
You boil the blood beneath my skin
The truth is on my side

You weigh me down and pull me to the ground
As if you are supposed to be my enemy
Cause every part of you tries to ignore the truth
You turned on me so I'll make you my enemy

Now I'm in this war as a country you invaded
I kept to myself 'fore you came charging in
And never bite the hand that feeds you
I swear I'll bring you down

You weigh me down and pull me to the ground
As if you are supposed to be my enemy
Cause every part of you tries to ignore the truth
You turned on me so I'll make you my enemy

You have declared a war that you could never win
You have declared a war that I will always win
(I'll bring you down)

You weigh me down and pull me to the ground
As if you are supposed to be my enemy

You weigh me down and pull me to the ground
As if you are supposed to be my enemy
Cause every part of you tries to ignore the truth
You turned on me so I'll make you my enemy
