

# Shine

Parov Stelar

When our souls were introduced  
No one of us could ever know  
What we will be going through  
Feeling high, feeling low

Been in hell, been above  
Cried for help, cried for love  
And when the darkness sleeps beside you  
And the mornings far away  
I wanna hold your hand and guide you..

Out of hell, out of darkness  
Finally we're able to see  
See the beauty not the beast  
One step further up at least

But one day

We will shine, we will shine  
We will fly so high  
We will shine, we will shine  
We will fly so high  
High  
High

But one day

We will shine, we will shine  
We will fly so high  
We will shine, we will shine  
We will fly so high  
We will shine, we will shine  
We will fly so high  
High  
High  
High
