California - I can taste you even now
California - I'll get back to you somehow
I still see you in my dreams
I hear your name on every tongue
It's been so long

California - You whispered to me all last night California - With your beauty like a knife I can hear your siren song Calling me back to your shore To die once more, California

California - I took my story to the well California - You're still eating at my soul How I miss your greedy eyes Our golden days, our purple nights

I'll pay the price, oooh California
