

Never Forget

Pavel Callta

I had a beautiful dream
That you are with me, by a stream
Mirrors of the stars and moon
Lying under the skyline
Of blue northern lights
Reflecting in your eyes

All those shadows hidden in lights
I am reading them from your lips
I just don't wanna wake up and see this is unreal

Oh, I will never forget
Oh, I will never regret
Oh, wish to take it all back
Oh please don't forget I will always love you

Oh, I will never forget
Oh, I will never regret
Oh, is this what you expect?
Never forget I will always love you

Is this a game or the end?
Tell me, do we really like pain? Not me
We are not anymore a team
Which was creating our new space-ark
Is there still any chance
That we may take one more dance?
Hiding in the pure romance, breathtaking,
Which was so strong, you are my greatest love

Oh, I will never forget
Oh, I will never regret
Oh, wish to take it all back
Oh please don't forget I will always love you

Oh, I will never forget
Oh, I will never regret
Oh, is this what you expect?
Oh, never forget I will always love you

Always, you are my light, my air, my love
I know that is changing right now to dark and blind
Oh, always, you are my light, my all, my love
I know that is changing right now to dark and blind

Oh, I will never forget
Oh, I will never regret
Oh, wish to take it all back
Oh please don't forget I will always love you

Oh, I will never forget
Oh, I will never regret
Oh, is this what you expect?
Oh, never forget I will always love you
