

Love Means Forever

Peabo Bryson

If I could paint a memory
I would try to paint the love in your eyes
And if I could write a symphony
I would fall in love so love would never die

There's a special kind of magic here tonight
I'm so glad you found the time to share my life

Here we are still friends
After all the tears
We've come to far, don't let it end
Forget about your fears
And promise me we'll stay together
Don't you know that love means forever
Forever and a day

I can look into tomorrow
And see enough to make it through today
But I'm lost without your loving touch
To carry me the rest of my way

There's a special kind of magic here tonight
I'm so glad you found the time to share my life

Here we are still friends
After all the tears
We've come to far, don't let it end
Forget about your fears
And promise me we'll stay together
Don't you know that love means forever
Well, leaving me never
Don't you know that love means forever
Forever and a day
Love means forever

Come to me like a memory
In the morning light of reality
Forever
If I could write a symphony
I would write the love between you and me
Forever
Love mean forever
