

# Real Deal

Peabo Bryson

You took me for a ride on your rocket, love  
Turned my whole world all around  
An emotional high to the stars above  
I'm never comin' down  
Something very extraordinary  
Right out of the dream  
In my own night, I was lost in time  
Things are not what they seem

Hold on to all your emotions  
Open your eyes, look inside your soul  
See the love and devotion  
You can't hide  
Open your eyes and see for yourself

The real deal, the way I feel  
Everything keeps comin' back to you, ah, ah  
The real deal, the way it is  
I like every single thing you do  
I like what you do, baby  
The real deal, a spinning wheel  
Every turn keeps pointing back to you, you

Could this be the chance  
I've been waiting for  
Is she the one for me  
Will I find romance like I did before  
Could it ever be  
The feeling is right  
But there's no compromising  
The timing is wrong  
But in the heat of the night  
When my temperature's rising  
I don't want to be alone

Hold on to all your emotions  
Open your eyes, look inside your soul  
See the love and devotion  
You can't hide  
Open your eyes, you can see it for yourself

The real deal, the way I feel  
Everything keeps comin' back to you, ah, ah  
(Oh, you)  
The real deal, the way it is  
I like every single thing you do  
I like what you do  
The real deal, a spinning wheel  
Every turn keeps pointing back to you  
You, you, you

The feeling is right  
But there's no compromising  
The timing is wrong  
But in the heat of the night  
When my temperature's rising  
I don't want to be alone

Hold on to all your emotions  
Open your eyes, look inside your soul  
See the love and devotion  
You can't hide  
Oh, open your eyes  
You can see it for yourself

The real deal, the way I feel  
Everything keeps comin' back to you, ah, ah  
(I said you)  
The real deal, the way it is  
I like every single thing you do  
I like what you do...
