

Come Into The Open

Penetration

Come into the Open

Maybe I should go or should I stay
Well I just don't know
I'm scared of going out alone
The vultures wait to tear
My soul apart

Come into the open
There's nothing left to hide
Come into the open
Where I can see your face
Among the crowd

I can remember feeling lost
Unwittingly I found my way
I sense the depth of your despair
The torturous guilt you carry
Everywhere you go

Come into the open etc

Bridge instrumental section

Show me, show me, lead me
Out into the open
There's nothing left to hide
Come into the open
Where I can see your face among the crowd

And through the misty haze
Of youth and ideology
I'm seeing things more clearly
now
I know that nothing can deceive
me as I

Come into the open etc

Come in
Come in
