Stand Strong

Pennywise

We will stand strong
You can rely on me
Time will move on
I'll never go away
Right what is wrong

Remember you don't have to pray for me today

We will stand strong
Through all the misery
Time will move on
I'll never watch you bleed
Right what is wrong

Remember you don't have to pray for me today

Everything you want to be is guided by your misery
you're broken, you're running out of time

Now the worlds turned inside out
A one way street so full of doubts
You've fallen into your demise

Scream and shout, turn it inside out
We're always searching for the reasons why
And now it's time for you to take what you believe in
The time is now, i'm taking back what's mine
There's no need to live your life without a reason
You've got to live every moment till the day you die

The time has come for you to see that life is filled with levity
Your choice is to hold your head high
Emotions they are bleeding out a shinning light to guide you
Now you're fighting, fighting for your life

Scream and shout, turn it inside out
We're always searching for the reasons why
And now it's time for you to take what you believe in
The time is now, i'm taking back what's mine
There's no need to live your life without a reason
You've got to live every moment till the day you die

We will stand strong
You can rely on me
Time will move on
I'll never go away
Right what is wrong

Remember you don't have to pray for me today

We will stand strong
Through all the misery
Time will move on
I'll never watch you bleed
Right what is wrong

Remember you don't have to pray for me today

And now it's time for you to take what you believe in
It's all right there in front of your eyes
There's no need to live your life without a reason
You've got to live every moment till the day you die

Till the day you die
