More Than This

Peter Gabriel

I woke up and the world outside was dark all so quiet before the dawn opened up the door and walked outside the ground was cold

I walked until I couldn't walk anymore to a place I'd never been there was something stirring in the air in front of me, I could see

More than this
more than this
so much more than this
there is something else there
when all that you had has all gone
and more than this
I stand
feeling so connected
and I'm all there
right next to you

It started when I saw the ship go down I saw them struggle in the sea and suddenly the picture disappears in front of me

Now we're busy making all our busy plans on foundations built to last but nothing fades as fast as the future and nothing clings like the past, until we can see

More than this
more than this
so much more than this
there is something out there
more than this
it's coming through
and more than this
I stand alone and so connected
and I'm all there
right next to you

Oh then it's alright when with every day another bit falls away oh but it's still alright, alright, alright and like words together we can make some sense

Much more than this
way beyond imagination
much more than this
beyond the stars
with my head so full
so full of fractured pictures
and I'm all there
right next to you
so much more than this
there is something else there

when all that you had has all gone
and more than this
I'm alone
feeling so connected
and I'm all there right next to you

More than this more than this more than this
