## We Fly So Close

## **Phil Collins**

'We never realise just how close we come to disaster whether in love or everyday life...'

My harbour lights are fading fast Soon they'll disappear Alone I sit in darkness Hoping someone might come near Though I wait, though I try No one ever comes And the feeling that I have flood over me The river starts to run

We fly so close We fly so close Sometimes we fly too close

Every place you run to, everywhere you turn There are places that you know you should not go But some bridges just won't burn All my life, though I try I cannot change the past And the ghosts that come back to haunt you Make you realise at last

We fly so close We fly so close Sometimes we fly too close We fly too close

My heart is racing much faster now Life passes before my eyes Something's I see, they make me smile Something's they make me cry So I look, so I try to find A lesson I can learn The passing of time hasn't changed my mind And the ghosts I know return

You know we fly so close We fly so close Sometimes we fly too close We fly too close

We fly so close, you and I sometimes Sometimes we fly so close, We'll never know how many times We fly so close We fly so close
