

## Every Which Way

Player

Through the long, cold nights of winter  
A man needs love to warm his heart  
Had my share of contribution  
Until you came along, melted me

I heard the sweet, sweet sound of angels  
Pouring down from heaven above  
In the spring, her young man's fancy  
Turns to thoughts of love, baby

You got me running  
Every which way, every which way, every which way  
Girl, you got me running  
Every which way, every which way, every which way  
Don't know where I'm going  
Every which way, every which way, every which way

I have always been a winner, yes, I have been  
I don't know where I stand, mmm hmm

You leave me hanging 'round your doorstep  
With my heart held in my hand, baby

You got me running  
Every which way, every which way, every which way  
Your crazy kind of loving  
Every which way, every which way, every which way

Is there a method in my madness?  
Is there a reason on my mind?  
All I wanna do is hold you  
But you don't ever seem to have the time

Every which way, every which way, every which way  
Girl, you got me running  
Every which way, every which way, every which way  
'Round in circles, baby  
Every which way, every which way, every which way  
I don't understand
