

Now I'd like to tell you what your smile was for
And I loved you from the moment that you walked in that
door

And I knew that I'd seen you before
Some other time
Some other place
Some other time
Some other place

Now I'd like to tell you 'bout your pretty face
And you know that you're a gift to the human race
My happiness is that smile on your face
Musta been now
Some other time
Some other place
Some other time
Some other place

When I get out of space with you
And the skies turn purple and the moon is blue
And I know I've been with you before
Some other time
Some other place
Some other time
Some other place
Some other place
Some other time
Some other place
Some other time
Some other place
