

# Venom of Venus

Powerwolf

Venom of Venus take us all for blind  
Bringer of poison for the heart and mind  
Never resist when your eyes inflame the wild  
Venom of Venus or a fairytale  
Sing of temptation when sirens wail  
Out of our minds by the wonders you unveil

Come blessed desire bring us all to fail

We are the cursed we came from fire and ice  
We are the first to kill the sinner for lies  
We are the blessed, we crave the venom of Venus for life  
All our life  
We are the sword we tame the fire, the flame  
We hail the lord we fear no rebel, no pain  
We are possessed we have the venom of Venus in veins

Venom of Venus inundate our veins  
Eradicate minds till only lust remains  
Set us ablaze like the wake of hurricanes  
Venom of Venus lead us all astray  
Bring us the sin before the martyrs pray  
Let it begin by the dawn of our judgement day

We are the cursed we came from fire and ice  
We are the first to kill the sinner for lies  
We are the blessed, we crave the venom of Venus for life  
All our life  
We are the sword we tame the fire, the flame  
We hail the lord we fear no rebel, no pain  
We are possessed we have the venom of Venus in veins

And in the eye of all the believing  
Lead us straight to the curse divine  
And by the time our hearts are healing  
Inject the poison in our minds

We are the cursed we came from fire and ice  
We are the first to kill the sinner for lies  
We are the blessed, we crave the venom of Venus for life  
All our life  
We are the sword we tame the fire, the flame  
We hail the lord we fear no rebel, no pain  
We are possessed we have the venom of Venus in veins
