

# Gravity Waves

Project Pitchfork

When stars are born  
No one can stop them  
And who could ever  
Neglect the thought  
Life's created  
All over the night sky  
Don't disrespect  
Nature's thought

When ideas are born  
No one can stop them  
And who could ever  
Neglect the thought  
Stars are emerging  
All over the night sky  
And they do respect  
Your nature of thoughts

Come to me unaltered  
Come to me undone  
Your world is just a shadow  
Reminder of the sun  
Come to me unaltered  
Come to me undone  
Your world is just a shadow  
Reminder of the sun

The ocean speaks in waves  
The life sings a song  
Rocks speak in shapes  
To be in rhythm to that one  
The ocean speaks in waves  
The life sings a song  
Rocks speak in shapes  
To be in rhythm to that one
