

One Day We Find

Quidam

Can't you see we're all running round, running round
Can't you see the sky is falling down, falling down
Share my dreams, make a change to the earth
Share your life with your friends, use your head
Why do you judge me 'cos I'm from a different place
I don't wanna be your slave ever again
Why do you hate me 'cos I'm of a different race

Why no one cares?
Does it mean that we live in a different space at all?
She can loathe, you can cry, we can kill, and I can die
The government's sick games and religion is to blame
We all bleed the same blood but tell me where is love?
