Leave It All Behind

I don't want to leave this world behind Was the only thing I had in mind Now you've sent the angels back I need them here on earth 'Cause eternity can be a long, long time Don't turn your back on me, don't take away my choice 'Cause reality is lying to my mind, so now

I want to leave it all behind I've got to leave it all behind I need a window out of time Come let me leave it all behind

Tell me 'bout the secrets of my life What is it that makes me feel this way I can feel my energy, it's turned against myself Like a downwards spiral heading straight to hell Maybe I could let it be and leave it all undone 'Cause I'm stumbling and it's time to say goodbye...goodbye

I want to leave it all behind I've got to leave it all behind I need a window out of time Come let me leave it all behind

I can feel my energy, it's turned against myself Like a downwards spiral heading straight to hell Don't turn your back on me, don't take away my choice 'Cause I'm stumbling and it's time to say goodbye...goodbye

I want to leave it all behind I've got to leave it all behind I need a window out of time Come let me leave it all behind
